## Press Release

The Norton Police Department will soon be utilizing a newly acquired Speed Monitoring Awareness Radar Trailer (SMART). The SMART trailer will be placed at different locations throughout the city for several days at a time to collect traffic data. Our goal is not to write speeding tickets but rather to encourage drivers to slow down in areas where residents have often complained of speeders. Drivers cannot receive tickets based on the flashing radar speeds, but the advanced machines collect data which will be analyzed by officers.

The Norton Police Department currently has the SMART trailer scheduled through November of 2016. The schedule is flexible but please be aware that the system may not be available during certain times due to weather conditions, mechanical problems, or scheduling conflicts. To request the trailer to be placed in your neighborhood, contact the Norton Police Department at 330-706-0084 Extension #127 or by E-Mailing Sergeant Brett McShane at [bmcshane@cityofnorton.org](mailto:bmcshane@cityofnorton.org).
