

Attention:
Important Notice
Regarding Your Recycling
and Waste Service

***** COVID-19 ANNOUNCEMENT *****

The following temporary adjustments to service are effective immediately:

1. Limit residential set-out to “Cart Contents Only” meaning only the residential solid waste cart should be placed at the curb.
2. Temporarily suspend bulk collection services. This is a less critical service to run during the pandemic and will free up our resources and assets to focus on the priority of solid waste collection.
3. Temporarily suspending the collection of any yard waste. Much of this material can be composted or at the very least, stored for a future date when it can be collected and properly disposed of.
4. Temporary suspension of recycling collection. Contaminants are at an all-time high and put recycle workers at an unnecessary risk.

During this time, we will utilize recycle trucks to support the volume increases seen by the trash collection drivers. Residents can use their recycling container for overflow of trash volumes during this time. **TO BE CLEAR:** all recycling containers placed at the curb will be dumped by the trash trucks and material will be hauled to the landfill.

5. Additionally, community recycle containers will temporarily be removed.

Thank you for your understanding during this difficult and unprecedented time.
